

Prime Therapeutics Video Transcript – “How PrimeMail works”

ENGLISH

Speaker:

Meet Lou. The man behind the machine. From bumper to bumper, bearings to brakes, Lou knows every inch of this car and what it takes to make it hum.

Kind of like PrimeMail, the home delivery pharmacy service that manages Lou’s long-term prescriptions like his very own pit crew.

Now, instead of waiting in line to pick up his long-term medicines, Lou has 90-day supplies delivered right to his mailbox—saving him time and money.

And behind each of those prescriptions there’s a real Prime pharmacist checking it 17 different ways before it ships, for an accuracy rating that leaves retail pharmacies in the dust.

Lou can order his medicine online, by mail or by phone, and get under the hood at MyPrimeMail.com to check his order status. And if he still has a question, he can call his Prime pharmacy team 24/7.

Prime. Helping you get the medicines you need so you can Go and Do. Because Lou doesn’t take Sunday drives to think about his prescriptions.

Sign up for PrimeMail today to fill your long-term prescriptions.
