Introduction

The attached Blue Cross and Blue Shield of Nebraska (BCBSNE) Four-Tier Prescription Drug List shows covered drugs for a broad range of diseases.

Generic drugs are shown in lowercase, **boldface** type. Most generic drugs are followed by a corresponding brand-name drug in parentheses. Some generic products have no corresponding brand name.

Brand prescription drugs are shown in capital letters, followed by the generic name.

The BCBSNE PDL 69 is organized into broad categories (e.g., anti-infective drugs). Within most categories, drugs are sub-grouped by drug class (e.g., penicillins) or by use for a specific medical condition (e.g., diabetes).

Show this list to your physician and pharmacist. Physicians are encouraged to prescribe drugs on this list, when appropriate. However, decisions regarding therapy and treatment are always between you and your physicians.

The current version of this drug list is available at the BCBSNE website at [NebraskaBlue.com/DrugList](https://www.nebraskablue.com/DrugList), or by calling the member services number listed on the back of your ID card. **Online pharmacy tools** are available through [myNebraskaBlue.com](https://mynebraskablue.com). With these tools, BCBSNE members can find drug cost estimates or check if a particular drug is on PDL 69.

How formulary drugs are selected

Drugs on this list are selected based on the recommendations of a committee made up of physicians and pharmacists from throughout the country. The committee reviews drugs regulated by the U.S. Food and Drug Administration (FDA).

Both drugs that are newly approved by the FDA as well as those that have been on the market for some time are considered. Drugs are selected based on safety, efficacy, cost and how they compare to other drugs currently on the list.

Tiers

This prescription benefit is multi-tiered, placing prescription drugs into one of four copay/coinsurance levels:

- Generic Drugs (Tier 1)
- Preferred Brand Drugs (Tier 2)
- Non-Preferred Brand Drugs (Tier 3)
- Specialty Drugs (Tier 4)

Note: Drugs listed with an “A” in the Drug Tier column indicates the drug may be covered at \$0 cost-sharing if you meet the criteria for \$0 cost-sharing under the Affordable Care Act.

Affordable Care Act

Please note: some drugs may have limited or \$0 cost-sharing under the Affordable Care Act. If you do not find the drug for which you are searching, contact BCBSNE to find out if the drug is available over the counter or is covered under your medical benefit.

Specialty Products

Specialty drugs are used in the treatment of medical conditions such as hepatitis, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral or injectable medications that can either be self-administered or administered by a health care professional.

Drug manufacturers restrict where you may obtain certain drugs. These drugs are marked as “Limited Distribution.” These may require the use of a designated pharmacy to fill a prescription.

Step Therapy

Your benefit plan may include a step therapy program. This means you may need to try another proven, cost-effective medication before coverage may be available for the drug included in the program. Many brand drugs have less expensive generic or brand alternatives that might be an option for you. If a step therapy is required for a medication listed in this document, it will be noted next to the medication with a dot under the Step Therapy column.

Preauthorization

Your benefit plan may require preauthorization for certain drugs that are high cost or have the potential for misuse. This means your doctor will need to submit a preauthorization request for coverage of these medications, and the request will need to be approved before the medication will be covered under your plan. If a preauthorization is required for a medication listed in this document, it will be noted next to the medication with a dot under the Preauthorization column.

Maximum Monthly Quantity

Maximum monthly quantities help encourage medication use as intended by the FDA. Maximum monthly quantities are placed on medications in certain drug categories. For the medications listed in this document, if a maximum monthly quantity applies, it will be noted next to the medication with a dot under the Maximum Monthly Quantity column.

Limits may include: quantity of covered medication per prescription and/or quantity of covered medication in a given time period.

There may also be limits for members within a certain age range, and coverage only for members of a specific gender.
