Summary of Drug List Benefits

The information in this document is designed to help you understand the prescription drug benefits offered under this plan and compare these benefits to those offered by other plans. Information contained in this summary is designed to help you compare, both the value and the scope of the drug list benefits.

How to Find Information on the Cost of Prescription Drugs: Your Summary of Benefits and Coverage (SBC) document lists information about your plan, including pharmacy deductibles, tiers, out of pocket maximums, and a link to this drug list document. This drug list document lists drugs covered by your plan, the coverage tiers and any special requirements for each drug. This drug list document includes a link on the bottom of each page to the Find a Medicine web-based tool on myPrime.com, which you may use to search for drugs for information on drug list coverage and estimate prices. Price estimates include total cost, plan and member cost share amounts (excluding any deductible requirements), and are based on the most recent actual network pricing. You may also use Pharmacy finder to review differences in estimated pricing between pharmacies. Drugs by Cost-Sharing Tier:

<u>Tier</u>	<u>Percentage of Drugs</u>
ACA	2.7%
Tier 1	15.8%
Tier 2	27.4%
Tier 3	8.3%
Tier 4	27.4%
Tier 5	13.3%
Tier 6	4.9%

Drug List Composition: This drug list (also known as a formulary) is a closed drug list; a closed drug list is a type of benefit design in which only medicines included on the drug list are covered. You may be able to get a medicine that is not on the drug list. But, you may have to pay 100% of the cost, unless a coverage exception is submitted and your health plan approves it.

The drug list is designed to provide you and your physician with the most safe, effective drugs at the most reasonable cost. The drug list is developed by a Pharmacy and Therapeutics (P&T) committee. The P&T committee is made up of a diverse group of doctors and pharmacists. When adding or removing drugs from the drug list, the P&T committee reviews each drug for its safety, effectiveness, and uniqueness. Health plans use the drug list to provide their members with effective drug therapies at reasonable costs. For this reason, using drugs from a drug list is important for both you and your health plan. Often, many drugs are available to treat the same condition. If two drugs are equivalent in effectiveness and safety, the drug list will include the lower cost drug. You are not limited to purchasing only those drugs that appear on your health plan's drug list.

However, you may pay more out-of-pocket for a drug that is not on the drug list. You may need to pay the full cost of a drug if it is not covered by your benefit plan. Changes in a drug list result from decisions made at P&T committee meetings. The Prime P&T committee meets at least quarterly to consider changes to the drug list.

For example, if a new drug is found to be more effective than one already on the drug list, the new drug may replace the less effective drug. A drug may also be removed from a drug list for safety reasons. The Food and Drug Administration (FDA) tracks drug safety information. The FDA issues reports about side effects, warnings or contraindications. Prime monitors these reports because they may trigger a change in a drug list.

Right to Request a Coverage Determination: If a drug is not covered under the drug list or requires utilization review prior to coverage, but your physician has determined that the drug is medically necessary, you have the right to request a coverage determination. Your cost share for medicines approved through coverage determination is based on your benefit plan's cost share for the appropriate non-preferred generic, non-preferred brand, or non-preferred specialty tier.

Right to Appeal: If your request for coverage is denied, but your physician has determined that the drug is medically necessary, you have the right to appeal and request coverage.

Continuation of Coverage: You have the right to continued coverage for a prescription drug at the coverage level or tier at which the drug was covered at the beginning of the plan year, until your plan renewal date, provided that the drug continues to be medically necessary and safe.

Off-Label Drug Use: Off-label use of FDA approved drugs occurs when a drug is prescribed for a reason that has not been approved by the FDA. Off-label use may be covered when all of the following apply:

- The medicine has been approved by the FDA for at least one use;
- The medicine is prescribed by a physician;
- The medicine is intended to treat chronic, disabling, or life-threatening illnesses;
- Sufficient clinical evidence is provided by your physician for the off-label use requested; and
- The services and medicine are medically necessary.

Members: Log in to your plan to find current drug pricing at <https://www.myprime.com/en/medicines.html#find-medicine>

Off-Label use of FDA approved drugs is not covered when these conditions are not met or when the FDA has determined its use to be contraindicated for treatment of the condition for which coverage is requested. Approved off-label medicine cost share is based on the tier in which the medicine is assigned within the drug list.

Limitations and Exclusions: Pharmacy benefits are not available for:

- Drugs required by law to be labeled: “**Caution - Limited by Federal Law to Investigational Use**,” or
- **Experimental** drugs, even though a charge is made for the drugs, or
- **Legend** drugs not approved by the FDA for a particular use or purpose or when used for a purpose other than the purpose for which the FDA approval is given, except as required by law or regulation.

Experimental / Investigational means the use of any treatment, procedure, facility, equipment, drug, device or supply not accepted as Standard Medical Treatment of the condition being treated or any of such items requiring federal or other governmental agency Approval not granted at the time services were provided. “Approval” by a federal agency means that the treatment, procedure, facility, equipment, drug, device or supply has been approved for the condition being treated and, in the case of a drug, in the dosage used on the patient. Medical treatment includes medical, surgical or dental treatment. “Standard Medical Treatment” means the services or supplies that are in general use in the medical community in the United States, and:

- have been demonstrated in peer-reviewed literature to have scientifically established medical value for curing or alleviating the condition being treated;
- are appropriate for the Hospital or Participating Provider; and
- the Health Care Professional has had the appropriate training and experience to provide the treatment or procedure.

Cost-Sharing: Your deductible is listed on your Summary of Benefits and Coverage document. Your deductible is the amount of money that you and anyone covered by your plan must pay out-of-pocket each plan year for covered services before your plan starts to pay. A certain set of drugs may be covered without cost-sharing, even before meeting the deductible. The out-of-pocket cost share for your covered prescriptions applies to your deductible until your deductible is met. Your cost share details are listed on your Summary of Benefits and Coverage for each of the tiers within this drug list. Your cost share may be a copayment (an amount you pay out-of-pocket for your prescription medicines after you’ve met any deductible) or coinsurance (a percentage of the total cost that you pay for your medicines, after you’ve met any deductible).

Your drug list has the following tiers:

- ACA (Preventive Drugs Not Subject to Deductible)
- Tier 1 (Preferred Generics)
- Tier 2 (Non-Preferred Generics)
- Tier 3 (Preferred Brand)
- Tier 4 (Non-Preferred Brand)
- Tier 5 (Preferred Specialty)
- Tier 6 (Non-Preferred Specialty)

Your cost share for a medicine is based on the tier in which the medicine is assigned within the drug list. Network discounts are applied to medicines dispensed at a network pharmacy, but are not available for medicines dispensed at a non-network pharmacy. You may be able to save time and money using the pharmacy mail home delivery option if you take maintenance medicine for a condition like high blood pressure, asthma or diabetes, and take your drugs for long periods of time. With home delivery pharmacy, you may get up to a three-month supply of medicines delivered to your home and, in some cases, you may pay a lower cost share.

Utilization Management Requirements: Utilization management is a process that is part of your health plan. Utilization management helps to make sure that you are getting the right drugs -- all while helping to make medicine more affordable. Health plans call for utilization management on some medicines to keep you safe, by helping to make sure the medicines you take are prescribed by your doctor and used correctly. These programs help to reduce waste, improve safety and keep medicine affordable. This drug list indicates when one of these programs applies to a drug. Utilization management is made up of programs that include:

Prior Authorization: Prior authorization (sometimes called pre-approval) means that your medicine needs to be approved by your health plan before it will be covered. Prior authorization helps improve safety and prevent misuse or overuse.

Step Therapy: This program uses a "step" approach with drugs for certain conditions. This means that you may have to first try a safe lower-cost drug, before "stepping up" to a different drug.

Dispensing Limits: This program controls how often or the amount you can get filled at once. These limits promote safe, cost-effective drug use. They also help reduce waste and overuse.

Limited Distribution: For some medications, you may need to use specified pharmacies to fill your prescription because the drug is only made available by the manufacturer to very limited pharmacies. Some of these medicines may be specialty medicines that are filled at a Specialty Pharmacy which specializes in particular classes of medication and health conditions.

Medicines requiring a health care provider to administer them and are administered in a hospital, doctor's office, or other medical setting may be covered by your medical benefits. Information on those medications may be found here: [bcbstx.com/docs/rx-drugs/drug-lists/tx/tx-medical-drug-list-2025.pdf](https://www.bcbstx.com/docs/rx-drugs/drug-lists/tx/tx-medical-drug-list-2025.pdf).

Introduction

Members are encouraged to show this list to their physicians and pharmacists. Physicians are encouraged to prescribe drugs on this list, when right for the member. However, decisions regarding therapy and treatment are always between members and their physician.

Drug lists updates – This list is regularly updated as generic drugs become available and changes take place in the pharmaceuticals market. For the most up-to-date information, visit myprime.com or bcbstx.com and log in to Blue Access for MembersSM or call the number on your ID card. Physicians can access the list from the provider portal at bcbstx.com.

How drugs are selected

Drugs on this list are selected based on the recommendations of a committee made up of physicians and pharmacists from throughout the country. The committee, which includes at least one representative from BCBSTX, reviews drugs regulated by the U.S. Food and Drug Administration (FDA).

Both drugs that are newly approved by the FDA as well as those that have been on the market for some time are considered. Drugs are selected based on safety, efficacy, cost and how they compare to other drugs currently on the list. Newly marketed drugs may not be covered until the committee has had an opportunity to evaluate based on these criteria.

How member payment is determined

This list shows prescription drug products in tiers. Generally, each drug is placed into one of six member payment tiers: Preferred Generic (Tier 1), Non-preferred Generic (Tier 2), Preferred Brand (Tier 3), Non-preferred Brand (Tier 4), Preferred Specialty (Tier 5) and Non-Preferred Specialty (Tier 6). Some brands may be placed in generic tiers and some generics may be placed in brand tiers. Some specialty medicines are marked with an "SP" in the Special Requirements column. Please refer to the Specialty Section for more information. Please refer to the ACA Preventive (ACA) section for drugs marked with an "AC" in the Special Requirements column. More information about other medications with \$0 or reduced cost share can be found in the Coverage Considerations section. To verify your payment amount for a drug, visit myprime.com or bcbstx.com and log in to Blue Access for Members or call the number on your ID card.

Your pharmacy benefit includes coverage for many prescription drugs, although some exclusions may apply. Generally, if a drug is not listed on the drug list it is not covered. For example, drugs indicated for cosmetic purposes, e.g., Propecia, for hair growth, may not be covered. Drugs that have not received FDA approval may not be covered. Prescription products that have over-the-counter (OTC) equivalents may not be covered. Drugs that are not FDA-approved for self-administration may be available through your medical benefit. Check your plan materials for details. Some medications covered under your pharmacy benefit(s) may need to be filled at a pharmacy that carries your medication.

How to use this list

Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Note: most reference brand drugs (in parentheses) are not covered.

Example: **atorvastatin** (Lipitor – brand is not covered)

Brand prescription drugs are shown in capital letters followed by the generic name.

Example: NOVOLOG - Insulin aspart inj 100 unit/ml

Drugs used to treat multiple conditions

Some drugs in the same dosage form may be used to treat more than one medical condition. In these instances, each medication is classified according to its first FDA-approved use. Please check the index if you do not find your particular medication in the class/condition section that corresponds to your use.

Please note: Drugs that need a health care provider to administer them and are often given to you in a hospital, doctor's office or other health care setting may be covered under your medical benefit. Some types of these drugs are contraceptive implants and chemo infusions. If you are taking or are prescribed a drug that is not on this drug list, call the number on your ID card to see if the drug may be covered.

Generic drugs

Using generic drugs, when right for you, can help you save on your out-of-pocket medication costs. Generic drugs must be approved by the FDA just as brand drugs are, and must meet the same standards.

There are two types of generic drugs:

- A **generic equivalent** is made with the same active ingredient(s) at the same dosage as the reference drug.
- A **generic alternative** is a drug typically used to treat the same condition, but the active ingredient(s) differs from the brand drug.

According to the FDA, compared to its brand counterpart, an FDA-approved generic drug:

- Is chemically the same
- Works just as well in the body
- Is as safe and effective
- Meets the same standards set by the FDA

The main difference between the reference brand drug and the generic equivalent is that the generic often costs much less.

Preferred brand drugs may be excluded or moved to a non-preferred brand tier after a generic equivalent becomes available. You may be responsible for the applicable member cost share payment amount (copay or coinsurance) plus the difference in cost between the brand and generic equivalent if you or your doctor requests the reference brand rather than the generic. Generic drugs usually have the lowest member payment amount.

Consider talking to your doctor about generic drugs

If your doctor writes a prescription for a brand drug that does not have a generic equivalent, consider asking if an appropriate generic alternative is available.

You can also let your pharmacist know that you would like a generic equivalent for a brand drug, whenever one is available. Your pharmacist can usually substitute a generic equivalent for its brand counterpart without a new prescription from your doctor.

Only your doctor can determine whether a generic alternative is right for you and must prescribe the medication.

Coverage considerations

Most prescription drug benefit plans provide coverage for up to a 30-day supply of medication, with some exceptions. Your plan may also provide coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Also, some drugs may only be covered for members within a certain age range due to the drug being used for cosmetic purposes or for safety concerns. Drug coverage may be limited to recommendations based on FDA-approved labeling and recognized evidence-based or clinical practice guidelines.

Over-the-counter exclusions: Your benefit plan does not provide coverage for prescription medications that have an over-the-counter version. You should refer to your benefit plan materials for details about your particular benefits.

Compounded medications: Your benefit plan does not provide coverage for compounded medications. Please see your plan materials or call the number on your ID card to determine whether compounded medications are covered and/or verify your payment amount.

Repackaged medications: Repackaged versions of medications already available on the market are not covered.

Prior Authorization (PA): Your benefit plan may require prior authorization for certain drugs. This means that your doctor will need to submit a prior authorization request for coverage of these medications, and the request will need to be approved, before the medication may be covered under your plan. For the medications listed in this document, if a prior authorization is commonly required, it will generally be noted next to the medication with a "PA" under the Special Requirements column. Some plans may have prior authorization on additional medications beyond those noted in this document.

Step Therapy (ST): Your benefit plan may include a step therapy program. This means you may need to try another proven, cost-effective medication before coverage may be available for the drug included in the program. Many brand drugs have less-expensive generic or brand alternatives that might be an option for you. For the medications listed in this document, if a step therapy is commonly required it will generally be noted next to the medication with an "ST" under the Special Requirements column. Some plans may have step therapy programs on additional medications beyond those noted in this document.

Dispensing Limits (DL)/Quantity Limits (QL): Drug Dispensing limits help encourage medication use as intended by the FDA. Dispensing limits are placed on medications in certain drug categories. For the medications listed in this document, if a dispensing limit applies, it will generally be noted next to the medication with a "QL" under the Special Requirements column. Limits may include: quantity of covered medication per prescription or quantity of covered medication in a given time period. If your doctor prescribes a greater quantity of medication than what the dispensing limit allows, you can still get the medication. However, you may be responsible for the full cost of the prescription beyond what your coverage allows. * Some plans may have a dispensing limit on additional medications beyond those noted in this document. For a list of medications and their dispensing limits, visit [myprime.com](https://www.myprime.com) or [bcbstx.com](https://www.bcbstx.com).

*Please note: For certain controlled substance medications, some state laws may not allow coverage by a health benefit plan of such medication if dispensed in a quantity beyond what the dispensing limit allows. You will be responsible for the full cost of the prescription with no benefits applied if the dispensed quantity exceeds the dispensing limit.

Limited Distribution (LD): Medicines marked as "LD" in the Special Requirements column may not be available at Accredo. You may need to fill your prescription at a pharmacy that carries your medication.

Shoppers: To find drug estimates go to <https://www.myprime.com/en/plan-preview/medicines/find-medicine.html>

ACA Preventive (ACA): Medicines marked as “AC” in the Special Requirements column are under the Affordable Care Act coverage of preventive services. These products have limited or \$0 member cost-sharing (copay or co-insurance), when meeting the conditions as outlined under the regulation. To see what contraceptive products may be covered, visit [bcbstx.com/docs/rx-drugs/tx/contraceptive-list-tx.pdf](https://www.bcbstx.com/docs/rx-drugs/tx/contraceptive-list-tx.pdf). Members with a High Deductible Health Plan (HDHP), designed for use with a Health Savings Account (HSA), may need to first meet their deductible before \$0 member cost-sharing begins.

You, or your prescribing health care provider, can submit a copay waiver or coverage exception request for ACA preventive medicines by calling the number on your ID card to ask for a review. Copay waiver and coverage exception forms for your provider to fill out are available at [bcbstx.com/provider](https://www.bcbstx.com/provider) or [myprime.com](https://www.myprime.com). If you meet the conditions as outlined under the ACA regulations, these products may have \$0 member cost-sharing (copay or coinsurance) when obtained from a participating pharmacy. BCBSTX will let you, and your prescriber, know the coverage decision after they receive your request. If the request is denied, BCBSTX will let you and your prescriber know why it was denied and offer you a covered alternative drug (if applicable).

Remember, medication decisions are between you and your doctor. Only you and your doctor can determine which medication is right for you. Discuss any questions or concerns you have about medications you are taking or are prescribed with your doctor. BCBSTX does not provide health care services and, therefore, cannot guarantee any results or outcomes.

Specialty drugs

Specialty drugs are used in the treatment of medical conditions such as hepatitis, hemophilia, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral, topical, or injectable medications that can either be self-administered or administered by a health care professional. Medications administered by a health care professional are not covered under the pharmacy benefit. For a current list of specialty medications, visit **myprime.com** or **bcbstx.com** and log in to Blue Access for Members.

Note that some drug classes may be excluded by some plans and therefore may not be covered under your pharmacy benefit. If you have questions about your coverage for specialty medications or your prescription drug benefit, call the number on your ID card.

Accredo®

Members who use specialty medications deserve the care and support they need to help manage their therapy. With Accredo, members can have covered specialty medications delivered directly to them or their doctor's office. When using Accredo for specialty medications, you also receive at no additional charge the following services:

- One-on-one support
- Condition-specific staff to help answer questions about your medication(s) or condition
- 24/7 support
- Free shipping with safe, on-time delivery
- Refill reminders and other digital tools

To order through Accredo:

1. Have your doctor send a new prescription to Accredo electronically, by fax or by phone. Your doctor can find contact information at accredo.com/prescribers.
2. Once the prescription has been received, you will receive a call from Accredo to get signed up and ready for your first prescription fill.
3. You can also call Accredo at 833-721-1619 and an agent will work with you to get a new prescription sent or transferred from another pharmacy.

If you have questions, please contact Accredo at 833-721-1619, visit accredo.com or call the number on your ID card.

Blue Cross and Blue Shield of Texas, is a Division of Health Care Service Corporation, a Mutual Legal Reserve Company, an Independent Licensee of the Blue Cross Blue Shield Association. Exception Process

You, or your prescribing health care provider, can ask for a Drug List exception if your drug is not on the Drug List. To request this exception, you, or your prescriber, can call the number on your ID card to ask for a review. BCBSTX will let you, your prescriber (or authorized representative), know the coverage decision within the lesser of two business days or 72 hours after they receive your request. If the coverage request is denied, BCBSTX will let you and your prescriber know why it was denied and offer you a covered alternative drug (if applicable).

If you have a health condition that may jeopardize your life, health or keep you from regaining function, or your current drug therapy uses a non-covered drug, you, or your prescriber, may be able to ask for an expedited review process. BCBSTX will let you, and your prescriber, know the coverage decision within 24 hours after they receive your request for an expedited review. If the coverage request is denied, BCBSTX will let you and your prescriber know why it was denied and offer you a covered alternative drug (if applicable).

Call the number on your ID card if you have any questions.

If you or your prescriber are asking for a copay waiver or coverage exception request for an ACA preventive product, please see the ACA preventive section.
