

## Vaccine Network Drug List

Effective January 1, 2023

Your employer has elected to include Vaccine Network coverage with your prescription benefit plan. The vaccines are conveniently administered at a participating pharmacy by a qualified clinician once you present your member ID card and any associated copay/coinsurance or prescription if applicable. Check with your benefit plan for details.

After selecting a participating pharmacy, it is recommended to check on availability of the selected vaccine and staff to administer it. **Please refer to your benefit materials for coverage details and the plan website for current information as this list will be reviewed periodically and is subject to change.**

*Generic prescription drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Reference brands may not themselves be covered, please check your benefit. Some generic products have no reference brand. Brand prescription drugs are shown in all capital letters followed by the generic name. Generic medicines are available for many of the brand-name drugs listed though may not be available in all strengths.*
