

Drugs Not Covered

April 1, 2026

In addition to this list, newly marketed prescription medications may not be covered until the Pharmacy & Therapeutics Committee has had an opportunity to review the medication, to determine whether the medication will be covered and if so, which tier will apply based on safety, efficacy and the availability of other products within that class of medications. The current list of newly marketed drugs can be found on our [New to Market Drug List](#).

Note: Drugs FDA approved for weight loss, cosmetic use or lifestyle modification are not included in this list. They are not covered on your policy unless specifically purchased separately.

If available, a generic version of a listed brand product is covered unless the generic is also listed (e.g., Abilify tabs are excluded but aripiprazole tabs are covered).

Abilify tablets	Adlarity patches	Amphetamine ER ODT (authorized generic of Adzenys)
Abilify MyCite tablets	Admelog vials	amphetamine sulfate tablets
Abrilada injection	Admelog SoloStar injection	Ampyra tablets
