Specialty Pharmacy Drug Management List

Definition of specialty medications: Specialty medications are generally prescribed for people with complex or ongoing medical conditions such as multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis. These high cost medications also have one or more of the following characteristics: injected or infused, but some may be taken by mouth; unique storage or shipment requirements; additional education and support required from a health care professional; and usually not stocked at retail pharmacies.

This list of specialty drugs is updated monthly, and is subject to change without notice. Not all listed specialty drugs may be covered under all plan drug lists (formularies). Please refer to your plan drug list for drug specific coverage information. Please note: Some employer groups may have specific drug coverage requirements for their employees that are not included in the criteria below.

Anti-infective

Key

*Prime Limited Distribution Network

(DT) Duplicate Therapy

(PA) Requires Prior Authorization

(ST) Requires Step Therapy process

Limited distribution drugs are medications that may have special dosing requirements or lab monitoring that need to be followed very closely. Because of this, the manufacturer or Food and Drug Administration sometimes chooses to limit the distribution of their drug to only a few pharmacies.

Brand-name products are capitalized (e.g. FLOLAN).

Generic products are in lower-case (e.g. epoprostenol sodium).

Retail benefits are pharmacy benefits offered at a local retail pharmacy.

Products on this list may need to be obtained through the participating specialty pharmacy network, unless otherwise noted. Individual benefits may vary.
