Prime Therapeutics LLC (Prime) is an independent company that manages pharmacy benefits for Blue Cross Blue Shield of Wyoming members

Introduction

This Blue Cross Blue Shield of Wyoming (BCBSWY) Standard Drug List, also called a patient medication guide, includes Brand drugs and Generic drugs. This guide, current at time of printing and subject to change, is updated quarterly. Members and physicians can review the most up-to-date version of the Standard Drug List at **https://www.bcbswy.com/pharmacy/.**

The Standard Drug List includes a list of prescription drugs, insulin, and diabetic supplies that reflect the current recommendations of BCBSWY. The Standard Drug List is developed in conjunction with Prime Therapeutics' National Pharmacy & Therapeutics Committee, which includes practicing physicians and pharmacists dedicated to providing patients with high-quality, cost-effective drug therapy. The Committee includes physicians and pharmacists from throughout the country. Prime Therapeutics does not have voting privileges. Drugs are reviewed in terms of safety, efficacy, and clinical uniqueness.

Member prescription benefit

Medications and supplies on this list are Preferred products. Drugs or supplies not listed are Non-Preferred (NP). Coverage of Preferred and Non-Preferred drugs will vary depending on your individual prescription benefit.

Some drugs may be excluded from coverage. For example, drugs indicated for cosmetic purposes, e.g., Propecia, for hair growth, are not covered. Prescription drugs may be excluded from coverage if there are over-the-counter (OTC) versions marketed. OTC drugs are not covered with the exception of insulin and selected diabetic supplies.

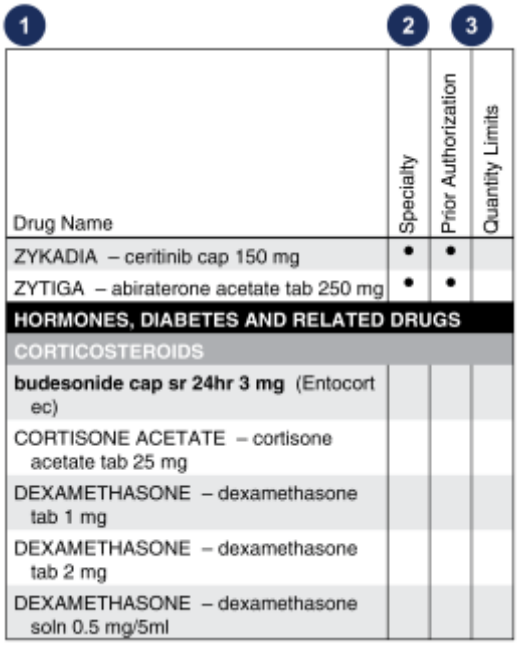
Prior Authorization

Drugs are selected for prior authorization (**PA**) because of actual or potential misuse or overuse that may be of clinical and/or economic concern. Drugs selected for **PA** require that specific clinical criteria are met before the drugs will be covered under a member's prescription benefit.

Not all drugs selected for **PA** are on the Standard Drug List. Coverage of Preferred and Non-Preferred drugs will vary depending on your individual prescription benefit. Drugs selected for **PA** are subject to change. For information about benefit coverage on specific drugs, please call **800.442.2376**.

How to use this list

This list is organized into broad therapeutic categories (e.g. Hormones, Diabetes and Related Drugs).Within most categories, drugs are sub-grouped based upon drug class (e.g Corticosteroids). All drugs listed, whether generic or brand, are Preferred drugs. The graphic below shows the information that is provided in each column of the medication list and is an example only. Please use the drug search function to find current information for drugs on the medication list.



1. The first column of the chart lists the drug name.

   Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand.

   Brand prescription drugs are shown in capital letters followed by the generic name.

2. The second column indicates if the drug is a specialty drug. **Note:** Additional information about specialty drugs can be found in this document under the header for Specialty Products.

3. The columns indicate the Utilization Management (UM) program(s) that apply to the prescription drug (e.g., Prior Authorization and Quantity Limits). If an indicator is present in the column(s), then the UM program noted is possibly applied to your benefit. Some plans may have UM on additional medications beyond those noted in this document.

Specialty Products

Specialty drugs are used in the treatment of medical conditions such as hepatitis, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral or injectable medications that can either be self-administered or administered by a health care professional. These high cost medications also have one or more of the following characteristics:

- Unique storage or shipment requirements
- Additional education and support required from a health care professional
- Usually not stocked at retail pharmacies

Generic substitution

BCBSWY encourages generic utilization as a way to provide high-quality drugs at a reduced cost. Generic drugs are as safe and effective as their brand-name counterparts, but are usually less expensive. Generic drugs are manufactured under the same strict standards of FDA's Good Manufacturing Practice regulations that are required for brand products including batch requirements for identity, strength, purity, and quality.

An FDA-approved generic drug may be substituted for the brand counterpart because it:

- Contains the same active ingredient(s) as the brand drug
- Is identical in strength, dosage form, and route of administration
- Is therapeutically equivalent and can be expected to have the same clinical effect and safety profile

To encourage the use of generic drugs, Preferred brand drugs usually become Non-Preferred after the generic equivalent version is added to the drug guide. If the brand drug you are looking for does not appear on this list, it may be present under the generic name. You can ask your pharmacist for assistance.
