## Introduction

The attached Blue Cross & Blue Shield of Rhode Island Commercial Large Group 6-Tier Prescription Drug List (Drug List) shows covered drugs for a broad range of diseases.

Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand.

Brand prescription drugs are shown in capital letters followed by the generic name.

The Drug List is organized into broad categories, like anti-infective drugs. Within most categories, drugs are sub-grouped by drug class, like penicillins, or by use for a specific medical condition, like diabetes. Members can also use this list to check for a particular drug or find drug cost estimates using on line tools available through the Prime Therapeutics® website at **www.MyPrime.com**.

Members are encouraged to show this list to their physicians and pharmacists. Physicians are encouraged to prescribe drugs on this list, when appropriate for the member. However, decisions regarding therapy and treatment are always between members and their physician.

The current version of this drug list is available at the Blue Cross & Blue Shield of Rhode Island website at **www.bcbsri.com** or by calling the customer service number listed on back of your identification card. **Online pharmacy tools** are available through the Prime Therapeutics® website at **www.MyPrime.com**.

## How formulary drugs are selected

Drugs on this list are selected based on the recommendations of the Blue Cross & Blue Shield of Rhode Island (BCBSRI) Pharmacy & Therapeutics (P&T) Committee. The P&T membership includes local practitioners and pharmacists who provide direct member care. The physician members include a minimum of five contracted and board-certified physicians, one of which will be a primary care physician (PCP), and at least three specialists, two community pharmacists, and the BCBSRI Chief Medical Officer or designee, as the acting Chairperson. Drugs that are newly approved by the FDA, as well as those that have been on the market for some time, are considered based on safety, efficacy, cost, and how they compare to other drugs currently on the list.

## Tiers

This prescription benefit is multi-tiered, placing prescription drugs into one of six copay/coinsurance levels:

- Lowest cost generic drugs (Tier 1)
- Low-cost generic drugs (Tier 2)
- Higher cost generic and Preferred Brand name drugs (Tier 3)
- Highest cost generic and Non-preferred Brand name drugs (Tier 4)
- Preferred Specialty drugs (Tier 5)
- Non-preferred Specialty drugs (Tier 6)

Note: Drugs listed with an “A” in the drug tier column indicates the drug may be covered at \$0 cost-sharing if the member meets certain criteria under the Affordable Care Act.

## Affordable Care Act

Please note, some drugs may have limited or \$0 cost-sharing under the Affordable Care Act. If you do not find the drug you are searching for, contact BCBSRI to find out if the drug is available over the counter or is covered under your medical benefit. Plan limitations may apply, consistent with recommended or approved indications for use.

## Specialty products

Specialty drugs are used in the treatment of medical conditions such as hepatitis, multiple sclerosis, and rheumatoid arthritis. Specialty drugs may be oral or injectable medications that can either be self-administered or administered by a health care professional. Specialty drugs are distributed through our preferred specialty pharmacy providers.

Drugs marked as “limited distribution” have been restricted by the drug manufacturer as to where you may obtain the drug. This may include requiring the use of a designated pharmacy to fill a prescription.

## Step therapy

Your benefit plan may include a step therapy program. This means you may need to try another proven, cost-effective medication before coverage may be available for the drug included in the program. Many brand drugs have less-expensive generic or brand alternatives that might be an option for you. If a step therapy is required for a medication listed in this document, it will be noted next to the medication with a dot under the step therapy column.

## Preauthorization

Your benefit plan may require preauthorization for certain drugs that are high-cost or have the potential for misuse. This means that your doctor will need to submit a preauthorization request for coverage of these medications, and the request will need to be approved before the medication will be covered under your plan. If a preauthorization is required for a medication listed in this document, it will be noted next to the medication with a dot under the preauthorization column.

## Quantity Limits

Quantity limits help encourage medication use as intended by the FDA. These limits are placed on medications in certain drug categories. For the medications listed in this document, if a quantity limit applies, it will be noted next to the medication with a dot under the quantity limit column.

Limits may include: quantity of covered medication per prescription and/or quantity of covered medication in a given time period. There may also be limits for members based upon clinical criteria for eligibility.

## Providers

If you have any questions on the following covered drug list, please contact our Member Service Center.

## Disclaimer

Your health plan's benefit design determines what is covered and the applicable copayment. The medications listed on this Drug List are subject to change pursuant to the formulary management activities of BCBSRI. The presence of a medication on this Drug List does not guarantee coverage. Certain therapeutic classes are routinely designated as formulary exclusions and are not eligible for coverage. These classes include Weight Loss, Erectile Dysfunction, Smoking Cessation, over-the-counter status products and drugs with over-the-counter equivalents, Vaccines, products with DESI designations and experimental drugs. Most brand name drugs with generic equivalents are not covered.

## Key

**cap** ..... capsules  
**chew** ..... chewable  
**conc** ..... concentrate  
**cr** ..... controlled release  
**dr** ..... delayed release  
**ec** ..... enteric coated  
**effe** ..... effervescent  
**equiv** ..... equivalent  
**er** ..... extended release  
**inhal** ..... inhalation  
**inj** ..... injection  
**liq** ..... liquid  
**lotn** ..... lotion  
**nebu** ..... nebulizer

**odt** ..... orally disintegrating tabs  
**oint** ..... ointment
