

Vaccine Network Drug List

Effective January 1, 2019

For those who participate in the Vaccine Network, the vaccines listed below can be conveniently administered at a participating pharmacy by a qualified clinician once you present your member ID card and any associated copay/coinsurance or prescription if applicable. This applies to Blue Cross plan members with coverage through the Blue Cross Pharmacy Vaccine Network. Check your Blue Cross benefit booklet to find out if this network applies to your plan. After selecting a participating pharmacy, be sure to check with the pharmacy on availability of the selected vaccine and staff to administer it.

Generic prescription drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in capital letters followed by the generic name. Generic medicines are available for many of the brand-name drugs listed though may not be available in all strengths.
