

Therapeutic Alternatives Prior Authorization with Quantity Limit Program Summary

POLICY REVIEW CYCLE

Effective Date
02-27-2026

Date of Origin

OBJECTIVE

The intent of the Therapeutic Alternatives Prior Authorization with Quantity Limit is to promote the use of lower cost, clinically appropriate, formulary alternatives over the high cost targets. Targets will be approved when the patient has experienced an inadequate response to optimized therapy of the lower cost alternative(s); the patient has a documented intolerance, FDA labeled contraindication, or hypersensitivity to the lower cost alternatives that is not expected to occur with the requested agent; or the prescriber has provided documentation and the pharmacist has reviewed and approved the patient's needs for the requested agent over the lower cost alternative(s).
